## **About Vehicle Problems and Road Call Reporting**

Vehicle Problem reporting can be used to interface Transportation and Maintenance departments by allowing dispatchers to record Road Calls and driver reported defects into the system as they are reported. A Work Order is generated as well as a Road Call report for the mechanic.

Safety related defect reports become Work Orders instead of Road Calls. Non-safety related defects maybe deferred and assigned on any subsequent Work Order generated for that asset.

Management inquiries and reports include problems by vehicle, driver, problem code, and mean time between failures. Instead of just recording the symptoms, now you can identify the cause of problems and work to eliminate them.

When the information is entered into the Road Call form, it can be printed and a Work Order is automatically generated. Upon closing the Work Order, the Road Call form is automatically closed. A Problem Correction Notice can be printed to inform the driver that the repair has been completed.

LTD miles at time of failure, miles since last occurrence, minimum miles, and maximum miles between failures are automatically updated for each vehicle any time Road Call or defect is reported.

## About This Guide

This guide contains standard cycles and checklists for operation and a description of each feature released with the module. The module description provides the intended application or use of the module and any comments that relate to this specific module.

The standard cycles are to be used when operating the software to ensure that all necessary steps are being taken in the correct order, i.e., Daily Service Cycle and the Monthly Service Cycle.

As with all Fleet-Net® for Windows modules, the module must first be installed as directed in the System Administrator Guide.

To correctly exit a form, or exit out of Fleet-Net® completely click on the

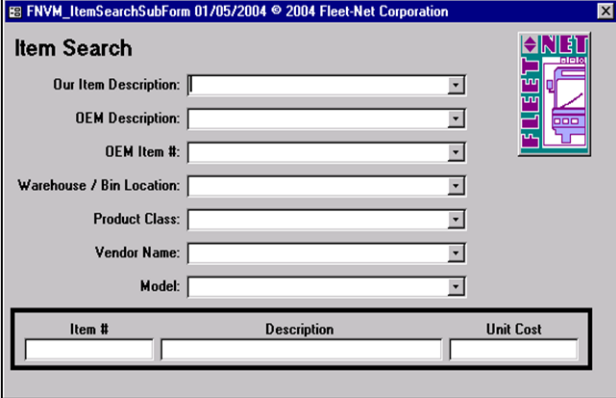

Fleet-Net® Icon  always located in the upper right of every form.

Throughout Fleet-Net® modules, there are Green

Checkmarks  that will appear next to specific fields. These Green Checkmarks when selected will open the Misc. List Codes form allowing the user to setup the necessary codes and their value for the associated field.

When the  binoculars search function is not available, nor a drop-down list, select 'Ctrl F' as

a search tool. When using the  button to search the following sample form will open up. Use any of the search item criteria to find your item select it and it will populate at the bottom of this form. To populate the previous form with the selected item simply hover over the item # and double click it. Close the search form.

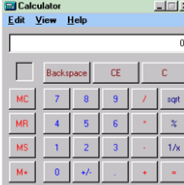

The clock  button allows for changing the time entry.

The calendar  button allows for quick selection of a specific date via a calendar.

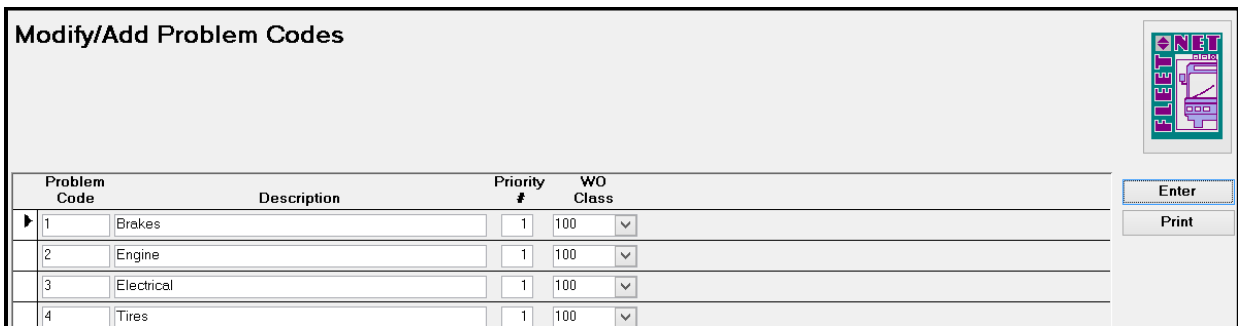

The calculator  button allows for quick simple calculations on the fly. It opens up your systems calculator.

## Modify / Add Problem Codes

This option allows you to set up vehicle problem codes describing the type of problem reported by the operator.

Field	Description
Problem Code	Enter a code that will best identify the specific problem. Up to 5 alphanumeric characters are allowed.
Description	Enter a description of problem code.
WO Class	Select the Work Order class code from the drop-down. These codes have been set up in WO module on the WO setup.
Priority	Enter a priority. The lower the number, the higher the priority. In the example above, 3 is the lowest priority and anything with a 1 would be of the highest priority.

## Edit Miscellaneous Codes

Click **Miscellaneous Codes** to define all codes used throughout the Vehicle Problems module.

Each Fleet-Net application includes a list of miscellaneous codes that are used within the system. Some of these codes are preset by Fleet-Net (Specific) while others are user defined.

Field	Description
Type	Select from the drop-down options.
Code	Code used to identify the type of code
Value	Definition of code

The **Print** button will print a listing of all Miscellaneous Codes. The report will display the **TYPE**, **CODE** and **VALUE**.

**Route:** (User Defined)

**Modify / Add Misc List Codes**

Module:

Type:

Code	Value
A1	Main North
B16	Campus South
CE1	Johnsonville Mall
D44	Airport
▶	

Print

**Signature:** (User Defined)

Is used for the storage and retrieval of the name and title of the person completing the corrections notice.

Vehicle Problems User Guide

Field Name	Description
Report Date	Manually enter or select the date the road call was reported via the calendar feature.
Report Time	Manually enter or select the time the problem was reported via the clock feature.
Vehicle #	Select the disabled vehicle.
Operator	Select the employee number reporting the problem.
Operator Name	Allows selection sorted by name if the employee # is not known. This field will not be populated unless it is used for Operator selection.
Location of Vehicle	Enter a location.
Direction of Vehicle	Enter the direction the vehicle is headed.
Run #/Block #	Enter the run or block number, if known.
Route	Select from drop-down or enter the route number, if known.
Dispatcher	This is the person taking the call and completing this form. Select the dispatcher's employee number; the name field will be populated.
Dispatcher Name	Allows selection sorted by name if the employee # is not known. This field will not be populated unless it is used for Operator selection.
Dispatch Date	Manually enter or select the date that the dispatcher enters this report via the calendar feature. Could be same date as above
Dispatch Time	Manually enter or select the time the report was entered into Fleet-Net via the clock feature. Could be same time as above
Scheduled Route Departure	Select the time the route is scheduled to depart its next stop via the clock feature.
Problem Code	Select a code applicable to the problem from the drop-down.
Problem Type	M = Mechanical Road Call (something wrong with the vehicle) O = Other Road Call (passenger ill, fight on bus, etc.)
Closed	The close date is automatically populated when the work order is closed.
Vandalism	Select the checkbox to indicate that the problem is due to vandalism (for NTD reporting)
Comment	Enter a brief comment, if applicable, what is wrong with vehicle, what is the situation

The maintenance department will take a copy of this WO with them and complete the action section of the Road Call. This section is outlined below. This data is entered into Fleet-Net upon the mechanics' return.

**Action**

Make/Model	Automatically populated.
Last Service	Automatically populated.
Last Cleaned	Automatically populated.
Out of Service	Enter the date that the unit was taken out of service.
Out of Service Time	Enter the time that the unit was taken out of service.
Out of Service Code	Select out of service code from drop-down menu. These Vehicle Status Codes have been setup on the VM14 menu: Setup Vehicle Status.

## Deferred Defect Entry

This feature allows entry of any vehicle defect reported by operators in which the repairs can be deferred until a later date. The defect can be assigned and repaired when a work order is generated for that vehicle, whether it is an inspection or a general work order. A work order is **not** automatically generated for a deferred defect.

**Deferred Defects Entry**

Reported Date: 2/22/2018      Vehicle #: 100

Begin Date:        ALL

End Date:        ALL

Begin Vehicle:        ALL

End Vehicle:        ALL

<b>Total:</b>									2

## Safety Defect Entry

Allows the entry of safety related items. These repairs need to be completed immediately for the vehicle to continue to operate in a safe manner. A work order is generated and can be printed for immediate repair.

### Safety Defect Entry

Location:

Asset Type:

Work Order #:

To generate a new Safety Defect, select a Location and an Asset Type from the drop-down list.

Click **Next WO #** to generate a new work order number based on the location and asset type. Location type and Asset type will become the first digits on the new work order.

The following dialog message will display.

## Vehicle Problems User Guide

The following form will display for entry of the safety defect related information. Use the table below for descriptions of each field.

Field	Description
Vehicle #	Select the vehicle number from the drop-down.
Report Date	Manually enter or select the date via the calendar feature.
Report Time	Manually enter or select the time via the clock feature.
Operator	Select the employee number of the operator reporting the defect.
Opened By	Select the employee number who is entering the defect.
Problem Code	Select the problem code describing the defect from the drop-down.
Vandalism	Select the checkbox to indicate that the defect is due to vandalism.

Click **Print WO** and a preview of the work order will appear on screen. Use the system file print options to print a hard copy. The work order can also be viewed and printed from the Work Order module. The settings in Dispatch or Customer Service can be adjusted to allow the user to send the Work Order directly to a printer in maintenance.

## Correction Notice

This notice allows for completion of a notification to the driver when the repair is completed.

### Correction Notice Selection Form

Leave Work Order # blank to preview all notices

Work Order #

Signature Name

Title

Select the Work Order # from the drop-down list to print a correction notice. Leave blank to print all completed work orders for reported defects.

Select the Signature Name and title to be printed on the notice.

Click **Preview Notice** to view the notice and print a hardcopy using the system file print options.

A sample of the correction notice is below.

### Problem Correction Notice

**DATE** 5/31/2017  
**TO** Bill Withers  
**RE:** Problem Correction Notice WO# 3V00002096

**You reported the following problem on vehicle** 1301

**Description** Brakes  
**Comment** Brakes are sluggish and the bus pulls to the right when I try to stop.

**Your report was received on** 5/28/2017

**Our maintenance department has performed the following task(s) to correct this problem**

**This work was completed on** 5/31/2017  
Thank you for helping us to maintain fleet safety and efficiency.

Sincerely,

Veronica Landry  
Customer Service Supervisor

## Purge

Allows for the deletion of Road Call and Safety Defects, Mileage History or Deferred Defects based on selected criteria, or a purge of all records.

**Caution should be used with Purge/Delete VP & Defects. When delete is selected, the records are completely purged from the system.**

**Access to this process should be restricted via security options.**

Field	Description
<b>Road Call Defects</b>	Select if you are deleting Road Call records.
<b>Mileage History</b>	Select to purge just the mileage history. This will start a clean slate for determining mileage between road calls and can be targeted for only a specific vehicle if necessary by selecting that vehicle in the Vehicle # field
<b>Deferred Defects</b>	Select if you are deleting Deferred Defects records.
<b>Vehicle #</b>	Enter a specific vehicle or locate using the drop-down list.
<b>Problem Type</b>	Enter a specific problem type or locate using the drop-down list.
<b>Problem Code</b>	Enter a specific problem code or locate using the drop-down list.
<b>Work Order #</b>	Enter a specific work order number or locate using the drop-down list.
<b>From Date and To Date</b>	Enter the date range using the Calendar button feature (this option available for Roadcall Defects and Deferred Defects)

The system defaults to all. However, the check mark is automatically removed when data is entered into a specific field or fields. The options without data entered will remain checked; however only the data that meets the criteria of the selection with data entered will be purged.

Select **Delete** to delete the selected records.

## Reports

Management reports include problems by vehicle, driver, problem code, and mean time between failures. The cause of problems can be identified in order to eliminate the problems. Select the report format from the drop-down list.

### Vehicle Problems Report

**Select Report** ▼

- Problems By Vehicle
- Problems By Driver
- Problems By Problem Code
- Vehicle Miles By Code
- Vehicle Miles By Type

Print

Select **Print** to display the report on screen. To print a hard copy of the report, select the system file print options. Sample reports are shown below.

### Problems by Vehicle Report

Sample Transit										
Vehicle Problems By Vehicle #										
Vehicle #	Driver	Employee Name	Date of Report	Time	Problem Code	Problem Description	Route	Block Run	WO #	#
100	1005		12/22/2017	12:44 PM	5	Electrical	120	1	3V00000015	
100	30113		9/18/2017	7:18 AM	2	Tires	A1		3V00000009	
100	99		2/22/2018	12:43 PM	1	Brakes			1V00000070	3
1200	1005		9/14/2017	4:47 PM	1	Brakes			3V00000007	
1200	1007		9/14/2017	11:22 AM	4	Engine	B16		3V00000010	
1200	1007		12/22/2017	3:55 PM	2	Tires			3V00000016	3
3333	2010		9/10/2017	2:04 PM	1	Brakes			3V00000008	1

**Problems by Driver Report**

Sample Transit										
Vehicle Problems By Driver #										
Driver	Employee Name	Vehicle #	Date of Report	Time	Problem Code	Problem Description	Route	Block Run	WO #	#
1005		100	12/22/2017	12:44 PM	5	Electrical	120	1	3V00000015	
1005		1200	9/14/2017	4:47 PM	1	Brakes			3V00000007	2
1007		1200	9/14/2017	11:22 AM	4	Engine	B16		3V00000010	

**Problems by Problem Code Report**

Sample Transit										
Vehicle Problems By Problem Code #										
Problem Code	Vehicle #	Driver	Employee Name	Date of Report	Time	Problem Description	Route	Block Run	WO #	#
1	100	99		2/22/2018	12:43 PM	Brakes			1V00000070	
1	1200	1005		9/14/2017	4:47 PM	Brakes			3V00000007	
1	3333	2010		9/10/2017	2:04 PM	Brakes			3V00000008	

**Vehicle Miles by Code Report**

Sample Transit										
Minimum/Maximum Miles Between Vehicle Failures Noted By Repair Type & Problem Code On Roadcalls & Driver Reported Defects										
Vehicle #	Repair Class Type	Problem Code	Problem Description	Date of Report	Time	Ltd Miles	Min Miles Between Occurs	Max Miles Between Occurs	#	
100	D	1	Brakes	2/22/2018	12:43	1023	1023	1023		
100	O	2	Tires	9/18/2017	7:18	400	400	400		
100	M	5	Electrical	12/22/2017	12:44	1023	1023	1023	3	

**Vehicle Miles by Type Report**

Sample Transit										
Minimum/Maximum Miles Between Vehicle Failures Noted By Repair Type On Roadcalls & Driver Reported Defects										
Vehicle #	Repair Class Type	Description	Date of Report	Time	Ltd Miles	Miles Since Last Occurrence	Min Miles Between Occurs	Max Miles Between Occurs	#	
100	D	#Error	2/22/2018	12:43	1023	1023	1023	1023		
100	M	#Error	12/22/2017	12:44	1023	1023	1023	1023		
100	O	#Error	9/18/2017	7:18	400	400	400	400		

## Defect Assignments

Deferred Defects are entered via Option #2, Deferred Defect Entry. Then they are assigned to work orders so they can be repaired.

With this option, the unassigned defects can be viewed, and a work order can be created so the repairs can be completed.

Click **Display Defects** and the following displays.

The screenshot shows the 'Defect Assignments' interface with a table of defects. The 'Display Defects' button is highlighted. The table has the following columns: Select, Vehicle #, Date Reported, Time Reported, Opened By, Opened By Name, Problem Code, Problem Description, Vandalism, and Comment.

Select	Vehicle #	Date Reported	Time Reported	Opened By	Opened By Name	Problem Code	Problem Description	Vandalism	Comment
<input type="checkbox"/>	120	3/4/2020	2:18 PM	1082	Parmenter Joseph	5	Electrical	<input type="checkbox"/>	The light over the rear door is flickering
<input type="checkbox"/>	123	3/9/2020	2:17 PM	1093	Munden Eric	7		<input checked="" type="checkbox"/>	Vandals painted the rear panel of the t
<input type="checkbox"/>	3333	3/9/2020	2:17 PM	1501	Sheakoski Pegeen M	DR_BR	Brakes - Dial A Ride	<input type="checkbox"/>	Brakes are mushy and pull to the right
<input type="checkbox"/>	4059	3/4/2020	2:19 PM	1513	Paige James	3	Windows	<input type="checkbox"/>	There is a crack in the fourth window l

Click the Select Box on the left to choose any of the defects or leave blank to choose all the defects. Click **Create Work**. System will ask for Location (the first digit of the Work Order # to be created). The system will create one Work Order for each defect. These can now be viewed in Work Order Entry and Work Assignment. Here is the WO for Vehicle 120 noted above.

The screenshot shows the 'Work Order Entry' interface. It includes fields for 'Work Order #', 'Asset Type', 'Asset #', and 'Open Date'. Below these are buttons for 'Assigned Defects' and 'Un-Assigned Defects'. A table shows the 'Defects Reported' for the selected work order.

Work Order #: 1V00000157 ? Asset Type: V Asset #: 120 Open Date: 03/09/2020  
 Transaction Date: [calendar icon] GL Po

**Defects Reported** [Assigned Defects] [Un-Assigned Defects]

Date Reported	Opened By Emp #	Problem Code	Problem Description	Comment	Assign
3/4/2020	1082	5	Electrical	The light over the rear door is flickering	<input checked="" type="checkbox"/>

# Vehicle Problems User Guide

The WO # will now be referenced here in Vehicle Problems, Option #3 Deferred Defect Entry, as well.
