

# ETMS Technology Benefits

---

Enterprise Transit Management Software or ETMS is a unique offering for Avail that provides features and functionality to power every part of a small to mid-size transit agency. This product offers several key features upon adoption:

## Hosting:

- Stability - Consistent software across all users
- Improved feature adoption - small frequent updates
- Leveraging Azure Hosting to provide the latest standards in security and disaster recovery

## Database Improvements:

- Database Encryption
- Migration to a site license
- Implementation of an Agile development process, leveraging automated testing

## ETMS Application:

- Continued commitment of backwards compatibility
- Compliant with all major browsers on any device
- Standard positions will access common functionalities
- In-Product Resource Center - In context help for the most common user problems
- In-Product Communication - Notes and latest release updates
